

Cranbourne

Curriculum statement of principles

Cranbourne has a well- balanced curriculum; diverse, enriching, with choice for all, enabling all students to gain a strong suite of qualifications to take them into post 16 education.

Our flexible approach includes a traditional academic focus, as well as vocational courses and well taught skills for life. We aim to open new doors, without closing off future pathways and create inspiring opportunities leading our students on a journey of self-discovery.

Cranbourne graduates are well-equipped to pursue the next step in their learning journey. A firm foundation of academic qualifications is complemented by vocational learning and employability skills; student leadership is a distinctive part of the school. We have high aspirations for all students and this is evident in the structuring of the curriculum, which allows for experimentation and choice in Year 9; and a fresh options process for GCSE. We maintain a firm academic foundation throughout.

Our nurturing environment and varied extra-curricular offer enables students to embrace new experiences and challenge themselves; including international visits, volunteering, community projects, work placements, residential, cultural, sporting trips.
